### Description:

Dual Layer mat is a .060" thick, 2-layer, dissipative dual layer rubber material. It is designed to provide a path to ground and eliminate static charge generation when used as a worksurface table mat, shelf liner, and cart liner. The surface resistance ( $1 \times 10E6 < 1 \times 10E9$  ohms Rtt) of the color top layer meets the ANSI/ESD S20.20 worksurface required limit and the ANSI/ESD S4.1 recommendation for contact with ESD susceptible items. The conductive ( $<1 \times 10E6$  ohms Rtt) black bottom layer reduces the resistance to ground (Rtg) from the top of the surface to the groundable point ground and allows the mats to be used with [ESD workstation monitors](#).

### Color Dissipative Top Layer Electrical Properties:

**Grounding:** This material must be properly grounded for optimum electrical performance. See Tech Bulletin [TB-2000](#) for mat grounding instructions.

**Cleaning:** For optimum electrical performance, surface must be cleaned regularly using an ESD mat cleaner. We suggest using our [Reztore Surface & Mat Cleaner](#). Do not use cleaners with silicone. Silicone buildup will create an insulative film on the surface.

**Use With Continuous Monitor:** This material may be used with [ESD workstation continuous monitors](#).
