

LPR & LPV Rigid Light Pipe New Product Announcement

This product features an innovative black adapter design that surrounds the LED and channels the light directly to the lens, eliminating light bleed at the source. Light bleed from the LED can cause false readings and muted or blended colors if other LEDs are present. Light bleed can also weaken the light intensity making it less visible at its destination point.

This series is available in two configurations to accommodate most application requirements and they are available in a range of sizes and lens styles.

LPV Series

This vertical rigid light pipe is an innovative solution that provides zero light bleed at the LED.

- Zero light Bleed at the Source
- High Vibration Environments
- Easy Installation
- Lens Diameters: 2mm, 3mm, 4mm
- Lens Styles: Flat, Dome
- Height Ranges: 0.800" – 1.250"
- **Industry Use:** Datacom, Energy & Utility, Audio/Video, Security, Healthcare

LPR Series

This right angle rigid light pipe is an innovative solution that provides zero light bleed at the LED.

- Zero light Bleed at the Source
- High Vibration Environments
- Easy Installation
- Lens Diameters: 3mm, 4mm, 5mm
- Lens Styles: Flat, Dome
- Height Ranges: 0.800" – 1.250"
- Length Ranges: 0.700" – 3.000"
- **Industry Use:** Datacom, Energy & Utility, Audio/Video, Security, Healthcare
