

PRODUCT BRIEF:

Logic :: Freescale

MCF5475 FIRE ENGINE System on Module

The MCF5475 Fire Engine is a compact, product-ready hardware and software solution that fast forwards your embedded product design.

The ColdFire MCF5475 processor is ideally suited for embedded industrial applications requiring simultaneous control, connectivity, and security. The Fire Engine module based on this processor is a complete System on Module (SOM) offering essential features for embedded applications. Using a SOM allows engineers to design a custom baseboard that meets their specific needs and is compatible with other Logic SOMs. This compatibility makes it easy for developers to upgrade their product for greater functionality and performance—while still using their original baseboard design.

By starting with the corresponding Zoom™ EVB Development Kit, developers can write application software on the same hardware that will be used in the final product.

The MCF5475 ColdFire processor from Freescale Semiconductor provides a broad range of peripheral support, making it an ideal processor for industrial and embedded applications.

MCF5475 Fire Engine

Designing a product around Logic's SOM allows developers to easily combine their core technologies with the high performance of the MCF5475 ColdFire processor.

MCF5475 FIRE ENGINE :: HIGHLIGHTS:

- + Product-ready System on Module with the Freescale MCF5475 ColdFire microprocessor running up to 266 MHz
- + SOM-ETX form factor
114 mm x 95 mm x 13.8 mm
- + Long product life-cycle
- + 0 °C to 70 °C (commercial temp)
- + RoHS compliant

ZOOM™ COLDFIRE EVB :: FEATURES:

- + Application baseboard
- + MCF5475 Fire Engine (M5475CFEE)
- + Necessary accessories to immediately get up and running
- + Kit available from Freescale (M5475EVBE)
- + See Zoom™ ColdFire EVB product brief for more information
