

16GB Card with NOOBS 2.1

PRODUCT ID: 1583

Description

NooBs 2.1 is the fastest way to have a variety of operating systems on your Pi. Available on a 16G card, you can now boot multiple OS's such as Raspbian, Pidora, RaspBMC, Snappy Ubuntu, etc. There's a boot up menu for selecting which one you like. **This card has NooBs 2.1 on it, works great and has enough space for 2 or 3 simultaneous OS options!**

Works with any and all Raspberry Pi computers except Raspberry Pi Zero W. Since NooBs has recently updated to add Pi Zero W support we recommend reformatting/burning NooBs on from scratch if your Pi Zero W doesn't run!

Contains:

- Raspbian 2016-11-29

Plug in Ethernet cable to also download the latest versions of

- PiDora
- RiscOS
- RaspBMC
- Snappy Ubuntu Core
- OpenELEC
